

PROJECT

Kali und Salz, Unterbreizbach

LOCATION

Unterbreizbach, Germany

CUSTOMER

Kali und Salz

DESIGN PRESSURE

PN 16

DIAMETER RANGE [mm]

DN 50 – DN 700

PRODUCT

Fiberdur CSEP 16

APPLICATION

Process water

CONSTRUCTION DATE

2012/2013

END USER

Kali und Salz

DESCRIPTION

This facility was installed in the plant Unterbreizbach for a cold pre-decomposition and improvement of the water protection. It is intended to utilize completely the process waste water resulting from the crude salt extraction, in order to avoid a direct drain into the river or the distribution of these waters.

SCOPE OF SUPPLY

- Pipes and accessories
- Prefabrication in Aldenhoven
- Partial engineering

ADVANTAGE

- Quick installation
- Long lifetime
- Corrosion resistance
